

Forestry Policy

While Mitsubishi Corporation is not a significant presence in the forest products industry, it still strives to ensure that its investment in this industry is handled in a careful and sustainable manner. Accordingly, the company has made the following commitments with regard to its forestry practices.

Mitsubishi Corporation will comply with all applicable environmental laws and regulations related to forestry. Any forestry lands or resources entrusted to be Mitsubishi Corporation or its subsidiaries will be managed with the utmost integrity.

All resource management plans will include the following:

- A comprehensive management plan
- A sustainable yield program
- A fully integrated multiple use action plan
- A plan for local participation to help maintain the historical, social and economic values of the site
